

Earthquake Safety Program

Notification

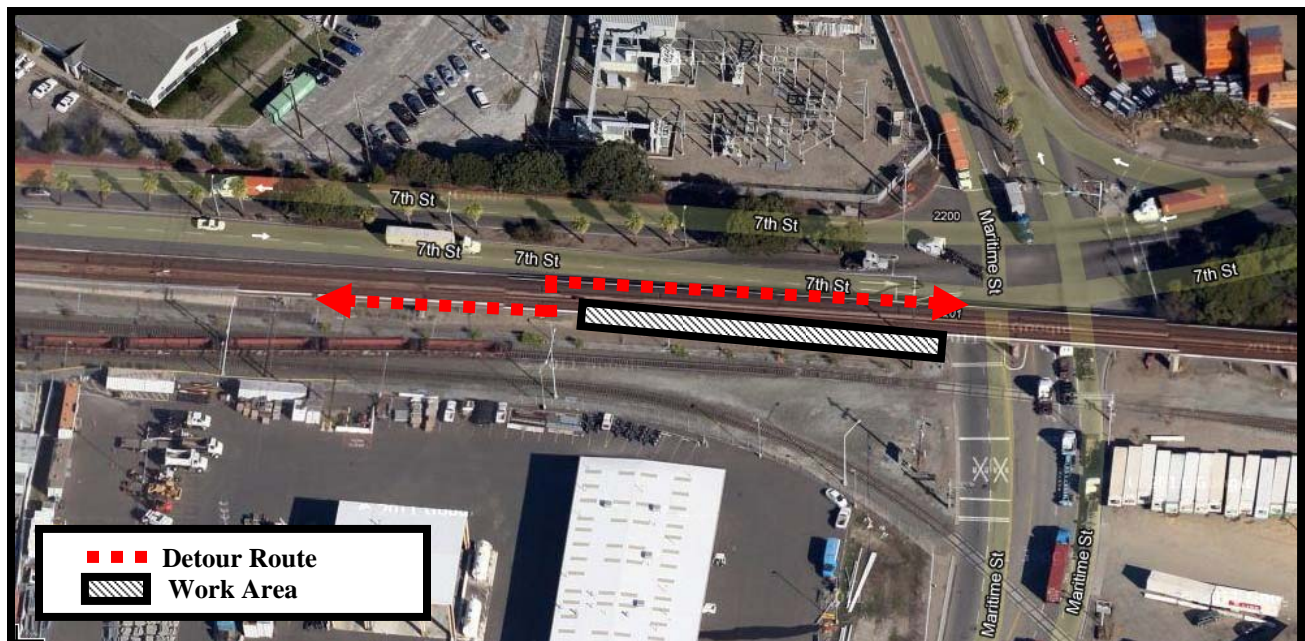

Bay Trail Temporary Detour

April 2012

Dear Community Member,

As part of our systemwide Earthquake Safety Program, strengthening work is in progress on BART's elevated structures from I-880 to the Transbay Tube to better withstand future earthquakes.

Beginning in mid-April 2012, strengthening work will begin along the Bay Trail approaching the intersection of 7th and Maritime streets. To make space for the work, the Bay Trail will be temporarily detoured to a dedicated bicycle/pedestrian path along eastbound 7th Street for approximately 300 feet (see map below). The detour will be in place for approximately four months. Work can take place between 7 am and 7 pm, Monday through Saturday with some night work. Once work in this location is complete, the Bay Trail will be restored to its original condition and reopened. Please look for signs with detour and safety information.

To contact the Earthquake Safety Program or obtain additional information, please visit our website at www.bart.gov/earthquakesafety or call our Program Information Line at (510) 874-7425. Thank you again for your patience and cooperation.

ABOUT THE PROGRAM

The BART Earthquake Safety Program will upgrade the original BART system to ensure safety and the ability to return to operation shortly after a major earthquake.

Priorities for strengthening work include BART's Transbay Tube, elevated structures and many stations.

Thank you for supporting BART's efforts to protect this Bay Area asset.
